Profile

Computer Science and Data Science undergraduate aspiring to begin a career as a game developer. Brings hands-on experience with C++, C, Python, and Java, along with a strong interest in interactive software, Arduino-based prototyping, and sustainability-focused technology solutions.

Education

MLR Institute of Technology

Bachelor of Technology (B.Tech), Computer Science and Engineering — Data Science

Hyderabad, India

Currently pursuing

Projects

Academic Project, Assistive Morse Communication Device

- Built an Arduino Uno-based communication device that accepts words through a keyboard, converts them into Morse code, and communicates the output through a vibration motor.
- Designed the prototype to support communication for people who are deaf and blind.
- Applied embedded-system concepts, input processing, signal encoding, and hardware interfacing.

Academic Project, Eco-Friendly E-Commerce Alternative Recommender

- Developed a concept that recommends an eco-friendly alternative when a shopper searches for a product on an e-commerce platform.
- Added an eco-score and an explanation of why the original product is less environmentally friendly.
- Focused on combining product discovery with sustainability-aware decision-making.

Leadership & Activities

Squad Club — Technical Member

- Member of the club's technical domain, participating in technical learning and collaborative activities.

Certifications

Python Essentials, Cisco

Cisco Certification, Cisco

CIE Certification, MLR Institute of Technology

Skills

- **Programming Languages:** C, C++, Python, Java
- **Core Interests:** Game Development, Object-Oriented Programming, Problem Solving, Data Science
- **Hardware and Tools:** Arduino Uno, Keyboard Input, Vibration Motor, Embedded Prototyping
- **Strengths:** Communication, Teamwork, Creative Thinking, Willingness to Learn
